Seven-Step Process
97% ESI Reduction*

BeyondReview's visual classificaton enabled services provide clients a complete eDiscovery and document review solution and are delivered in an approach that includes:

1. **Collection**: Forensically sound collection and initial data processing.

2. **Visual Grouping**: Completes processing and grouping of visually similar documents.

3. **Assessing Groups**: Attorneys assess the potential relevance of document groups. One objective document group decision can affect thousands of individual documents.

4. **Applying Concepts**: Attorneys create and apply concepts to determine potential relevance of documents within assessed groups. Only technology that offers positional search capabilities.

5. **Evaluating Sensitive Data**: Attorneys identify and consider sensitive data prior to substantive review.

6. **Conducting Substantive Review**: Attorneys review potentially relevant documents on the review platform of choice or with BeyondReview's integrated review tool.

7. **Document Production**: Appropriate documents as required.

BeyondReview provides all of the technology and talent fully supported by discovery experts, project managers and trained review attorneys.

Sound. Defensible.
Collection/Legal Hold

BeyondReview's legal hold approach uses advanced technology to quickly and cost effectively:

- **Automate** collection and retention of legal hold documents with proprietary Collector Technology.
- **Continue** organizational content management and retention policies without the constraints of collected and retained legal hold copies.
- **Accomplish** defensible disposal of legal hold documents upon legal release.

This enables compliance with preservation holds without interrupting business and retention continuity.

Comprehensive.
Email & Attachments

BeyondReview uses the following comprehensive and defensible process to handle emails and attachments:

1. Emails and attachments **collected.**
2. Attachments are **grouped** for analysis.
3. Emails **deduped** based on hash value and message ID and then consolidated based on EML format.
4. Attachments **processed** and **assessed** using visual classification technology.
5. Discovery **concepts applied** to all emails and attachments.
6. Potentially relevant emails and attachments exported to review tool for **substantive review** and QC.
7. Emails and attachments **produced.**

# Fast. Accurate.
Sensitive Data Evaluation

BeyondReview's redaction capability leverages advanced visual classification technology to evaluate sensitive data and redact based on either word or pattern matching or on redacting certain zones within groupings of visually-similar documents. Called BeyondRedaction, this capability includes:

1. **Automated** grouping of documents to allow reviewers to learn the location of sensitive data.
2. **Targeted selection** of sensitive data to be redacted based on either text values or page coordinates.
3. **Defensible** redaction of sensitive data.

This capability allows corporations to quickly and cost effectively redact sensitive data at a rate far exceeding traditional manual redaction technologies and processes.

Visual Classification
Technology Advantage

Key Differentiators
Beyond Other Offerings

BeyondReview
Power. Precision. Speed.

Classify All Data Types

BeyondReview's visual classification is the only technology that classifies all document types regardless of amount or quality of associated text.

Without Classification

Visual Classification with BR

Four Differentiators

BeyondReview's new generation eDiscovery services are the only eDiscovery services that:

1. **Auto-classify** by visual similarity **any document type** regardless of the presence of text.

2. **Provide** a **complete, secure and encrypted collection capability** enabled by a proprietary collection and storage connector device. The connector device also serves as a forensically sound and completely **defensible legal hold repository**, allowing organizations to continue regular disposition of in-use files.

3. **Auto-redact** all document types based on visual similarity at a rate **15 times faster** than traditional manual redaction processes.

4. **Auto-classify** and process by visual similarity **all email attachments while fully maintaining family relationships**. Additionally email processing provides a **single instance email conversation chain** containing all communications without redundancy.

"Integrating our proven people and processes with a new generation of technology allows us to deliver services from data collection through production with power, precision and speed not available from text-based discovery platforms."

Rob Miller, Managing Member, BeyondReview

The **visual classification technology** used by BeyondReview is the only enterprise-scalable service available for grouping visually similar documents, thus **significantly decreasing the amount of data to be reviewed by eDiscovery and review experts**.

Advanced Technology. Advanced Approach. Advanced Results.

About BeyondReview

Founded in 2011 as DW Legal and based in Houston, TX, BeyondReview is a data-driven discovery services company that uses visual classification technology and expert review attorneys to deliver end-to-end discovery with **power**, **precision** and **speed**. Experienced in managing the most complex managed document reviews in history, learn more today at BeyondReview.US.
